Solutions in waste handling

IQR FlexHammer™ 1800 Crawler

Multi purpose heavy duty hammermill

- » Outstanding performance with 35 years of built-in experience.
- » The FlexHammer™ system presents great flexibility regarding variation in feed materials.
- » Swedish quality.

WELL KNOWN FOR IT'S UNBEATEN CAPACITY AND FLEXIBILITY.

The FH1800 Crawler Unit is a well known all purpose, heavy duty, high capacity hammermill of industrial quality standard.

Typical feed materials:

- » Wood waste e.g. demolition timber, railway sleepers, treetops and branches, bark, offcuts from industries etc.
- » Household waste.
- » Industrial waste of different kinds.
- » Commercial waste, packing materials.

Finished products:

Are being used as fuel for energy production or for compost or just for volume reduction.

Particle size of finished products:

The hammermill's design allows for a large variety of the finished products' particle size. Typical finished products are e.g. between 0-50, 0-100 and 0-250 mm.

Contaminations:

The hammermill has a mechanical safety device in form of a reject door which opens in case of pressure from uncrushable objects. Stones will be crushed.

FlexRejectDoor™

This is a safety device which protects the mill from damage and stoppages if any uncrushable material is fed in by mistake.
